Chromotherapy LED lighting system User Guide

Press these buttons to turn on, change colour and turn off:

(If there are more than one button, one will control the lights at the seat end of the bath, the other will control the ones at the tap end of the bath)

*** The buttons are touch sensitive, they do not require force to turn on and off – pressing these hard could cause damage ***

Instructions for Use:

- **Press button once to turn on**
- **Press again to change to the next colour (colours start at Green)**
- **Press again to change to next colour**
- **Do this to change through all 7 colours**
-

- **At the end of the sequence the last press will turn them off**
- **At any time in the sequence, press and hold for 2 seconds to change to slow auto rotating spectrum of colours**

Cleaning:

The Lights & touch buttons may be cleaned using mild cleaning agents and anti-bacterial solutions.

Chemical agents and solvents must not be used, for example, Drain/oven Cleaner, Acetone, or Acids.

Do not use abrasive cleaning cloths, sponges, or scourers to clean these items of the Bath or tapware.
